HOW TO USE THIS GUIDE

This symbol shows which companies will check students' job applications.

This stamp shows which companies offer cooperate studies, also known as combined dual studies.

This tick shows which companies offer training or work experience abroad.

MESSAGE

FROM PRESIDENT

It is a great pleasure for the Deggendorf Institute of Technology (DIT) to welcome you all to the sixth job fair at our faculty European Campus Rottal-Inn in Pfarrkirchen.

This event is living proof that studying at a university such as DIT delivers a very special, very close connection between local companies and academia. Actually, the convention is an awesome opportunity to get even closer and so it became an attractive platform for both employers and students to make valuable personal contacts. This is for sure: receiving excellent academic education in the lecture halls is one thing, but gaining practical experience in a working environment is the other side of the same coin. Therefore, it's highly important to know each other better and do some fruitful networking today. Maybe in English, even better in German.

This year, 14 companies are going to show up at our campus, looking for suitable potential employees with academic training in their respective fields. In turn students may showcase their skills and find out about available internships and graduate positions.

I would like to thank the Career Service of the Deggendorf Institute of Technology and the student association First Contact e.V. for their efforts they put into planning this convention. In addition, many thanks all the exhibitors for being committed to supporting young people in their first steps into professional life. This is outstanding!

Prof. Waldemar Berg
President DIT

WELCOME

FROM FIRST CONTACT

Dear Exhibitors,
Dear Prof. Berg,
Dear mayor Beißmann,
Dear Professors and Students,

It is a great pleasure to welcome you to this year's First Contact Job Fair at the European Campus. The growing interest in our job fair over the past years shows that both companies and students highly value the chance to connect, share ideas, and explore new opportunities together.

Our aim as the student association First Contact e.V. is to give European Campus students the chance to connect with company representatives from a wide range of industries, whether for study theses, internships or career opportunities. We are proud to announce that this year, the European Campus has recruited 14 companies for its own firstcontact job fair.

Thanks to the excellent education provided at European Campus, our students have the potential to become highly skilled, motivated professionals with strong social and interpersonal skills.

Making a positive first impression is just as important as specialized knowledge. The Career Service offers various seminars to help students improve their communication and application skills, ensuring they can confidently present themselves to company representatives.

We also hope that professors will seize this opportunity to explore potential joint projects with DIT, giving students valuable insights into real working life during their studies.

We would like to express our sincere gratitude to the Career Service and DIT for their support, and we are proud that together we have made this job fair possible. Special thanks go to Prof. Berg, the First Contact team, and the staff members of DIT and European Campus for their dedication, as well as to the Career Service for the outstanding planning of the 6th job fair.

On behalf of First Contact e.V., I wish you an inspiring and successful job fair, full of meaningful connections and exciting opportunities.

Anneliese Schützenberger
Chairwoman, First Contact e.V.

CAREER SERVICE ADVICE & SUPPORT

Application as electrical engineer, your offer on the DIT job platform

Dear Mr./Ms. Eckinger,

research the contact person

Thank you very much for the informative and friendly talk at the Job fair European Campus in Pfarrkirchen on 08 November 2023. This once more encouraged me to apply as an electrical engineer with knowledge in developing and controlling in automotive electronics.

I am currently writing my bachelor thesis about "Conceptualizing and developing control devices in cars". I have already gained theoretical knowledge at Deggendorf Institute of Technology in the technical electronics major, which is about automotive electronics and their programming. Before my studies, I worked as an electronics engineer for two years. Self-reliant project work was a crucial part of my tasks. Therefore, I am used to structured and target-oriented work. During my internship at Auto AG, I worked with technology and administration specialists and was able to gain experience in multi-functional teams.

In the course Control Units in Cars, I was able to proof successfully my analytical skills. The course aim was to research the function of control units and program them for certain tasks. I particularly enjoyed analyzing complex problems and finding a solution.

At the "Bewerbertraining" seminar at Deggendorf Institute of Technology, I was able to gain first positive insights into your industry-leading company.

I would like to support your company by January 2024.

I am looking forward to an invitation for an interview.

Complimentary close

Yours sincerely

P. Mustermann
